

Innovation is the future, be a part of it!

No matter your faculty or year of study, the innovation ecosystem needs you.

Innovate Calgary has been catalyzing the innovation ecosystem since 1986 and you are invited to be a part of it with us! We support students, researchers, entrepreneurs, and startups as they explore new and innovative solutions to life's big problems.

Offerings now

As a student, you can support early-stage startups, take part in innovation training or help manage Western Canada's first student run investment fund (UCeed Haskayne Student Fund). And Innovate Calgary alongside the UCalgary ecosystem will help you along the way. We provide many opportunities for guidance and experiential learning for new students. You can:

Intern with a startup company

Be mentored by an innovator through our Experience Ventures internships (funded through the Hunter Hub).

Manage an investment fund

Open to all students of all faculties with 2 years left in their studies, you will get training from leading investors and innovators and invest in startups.

Offerings for a future you

Innovate Calgary will support you as you progress through your program and future research endeavors by providing tech transfer offerings, fellowship programs, access to research facilities, access to startup incubator space and so much more.

Access in Yr 1
and beyond

Internships at startups
